Deadline for manuscript  
submissions:

**31 October 2021**

### **Message from the Guest Editors**

The sustainable development of human societies has its foundations on the mindful use of natural resources and the preservation of ecological equilibria. The pragmatic framework to achieve these goals implies an adaptive ecosystem management, a strategy allowing recursively improving policies and actions in the light of their outcomes. Environmental monitoring, and biomonitoring in particular, is pivotal in this process by providing the feedbacks driving the adaptive process. The questions, approaches, and methodologies that had dominated the field of biomonitoring for decades are currently facing a rapid transition toward next-generation biomonitoring, bringing new, exciting challenges to address.

This Special Issue aims at becoming a comprehensive platform for sharing exciting new advancements in biomonitoring as well as more traditional studies. Relevant articles from all areas of biomonitoring, from all environmental compartments all over the world, employing every kind of technique and focusing on all the levels of ecological organization, from organisms to ecosystems, are welcome, as are the articles focusing on the integration of biomonitoring.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:**—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed by the [Science Citation Index Expanded](#) and [Social Sciences Citation Index](#) (Web of Science), as well as [Scopus](#) and [other databases](#).

**Rapid Publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 14.7 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2020).
